

Notice of Non-Responsive Amendment

1. The amendment filed on 02/06/2008 is not fully responsive to the prior Office action of 06/01/2007 because of the following matter(s):

2. Amended claims 1, 2, 11-12, 14-15, 20-21, 25, 34-35, and 71-75 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons:

The amended claims 1, 2, 11-12, 14-15, 20-21, 25, 34-35, and 71-75 have separate utility such as having a hardware managed stack to hold a plurality of VMX mask word values corresponding to a plurality of virtual machines (VMs), wherein a current VMX mask word value of the plurality of VMX mask word values is to be utilized to mask access by the current VM to a VMX control word without regard to an invalidation operation belonging to a non-empty set of invalidation operations composed of a union of five (i.e., (1),(2),(3),(4) and (5)) possibly empty sets of operations.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 1, 2, 11-12, 14-15, 20-21, 25, 34-35, and 71-75 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.
